The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Grell et al (Pat. No. 5,815,538).

Grell et al teach a method of determining location at a receiver in a communication system having at least a first and a second satellite transmission source and optionally a first terrestrial transmission source in a communication with at least the first or the second satellite transmission source including the steps of receiving 22 a first synchronization pulse (112; col 1, lines 26+) from the first satellite transmission source and receiving 22 a second synchronization pulse from the second satellite transmission source, measuring (114; abstract) a time difference between the first synchronization pulse and the second synchronization pulse, and determining (116; abstract) an approximate location based on which synchronization pulse between the first and second synchronization pulse is received first at the receiver.

Claims 1-26, 29 are allowed.

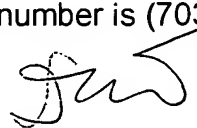

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
